Skill Portfolio

Assessed Skills

React / Frontend Development

Level: L4 (AI: L3 / Override: L4) | Confidence: High

Synthetic fixture: describes a measured approach to state isolation. The quote supports provenance; a human still needs to judge relevance and depth.

Evidence:

• I split state by update frequency and measured the result with the React profiler.

Assessor Note:

Synthetic demo override: reviewed the excerpt in context. This is a workflow example, not a real candidate assessment.

Communication

Level: L2 | Confidence: Low

Synthetic fixture: describes communicating a status update with support from a lead. Interview coverage caps confidence at low.

Evidence:

• I wrote an incident update but relied on my lead to align stakeholders.

System Design

Not assessed: verified evidence required | Confidence: Low

Insufficient verified evidence. Collect a follow-up assessment before assigning a level.

Database Design & SQL

Not assessed: verified evidence required | Confidence: Low

Insufficient verified evidence. Collect a follow-up assessment before assigning a level.

Fit/Gap Analysis / Frontend Engineer / synthetic role

Skill	Required	Candidate	Result	Delta
React / Frontend Development	L3	L4	Exceeds	+1
Communication	L3	L2	Gap	-1
System Design	L3	—	Not Assessed	—
Database Design & SQL	L4	—	Not Assessed	—

Overall Assessment

2 of 4 requirements have assessed evidence. 2 need follow-up. Skill comparisons support human review; they are not a hiring recommendation or a culture assessment.
